**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites the limitation "the electrode" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 14 recites the limitation "the electrode" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 21 recites the limitation "the electrode" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 22 recites the limitation "the electrode" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 25 recites the limitation "the electrode" in line 4. There is insufficient antecedent basis for this limitation in the claim.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 3739

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 14-17, 19, 20, and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent 5,906,613 to Mulier et al. Mulier et al teaches a catheter for RF ablation with an electrode (Fig. 2, #14) on an electrode carrier (Fig. 2, # 12). The electrode is coupled to a commercially available RF electrosurgical source (Col. 4, line 49). The electrode has a cavity within (internal lumen, Col.5, line 37) for introducing a solution into the tissue and fluid channels (Fig.8) to provide heating or cooling of the solution and electrode. Heated or cooled solution is pumped into these channels (Col. 7, line 35). Commercially available heating or cooling baths are employed for temperature regulation up to 50 degrees centigrade (Col. 9, line 45). Such baths include flow control. The device can include a second electrode (Col. 5, line 23). The temperature control of Mulier et al (Col. 6, lines 11-21) teaches a closed loop control that includes reference teachings from U.S. Patent 5,122,137 to Lennox that include temperature profile control of an RF generator.

#### ***Allowable Subject Matter***

Claims 18, 21-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Art Unit: 3739

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
